Food & Nutritional Testing

Food and Nutritional testing has been the main business of ILS for over 30 years. With our vast knowledge, experience and technical expertise, there can hardly be a food product or raw material that we have not analysed. As such our nutritional chemistry and analytical laboratories are amongst the most impressive, privately owned, analytical facilities in the country.

Continued expansion and investment in new technologies, instrumentation and laboratory personnel has led to our scope of UKAS accreditation and chemical testing to be one of the most extensive in the UK.

Fully equipped with a range of instrumentation including, GC, GCMS, HPLC, Dionex, AA Spectroscopy, PCR, AOAC Fibretech, Protein Analyser, (Dumas) and NMR Fat Analyser.

Our wide range of testing includes:

- Group 2 Nutritional Testing, including AOAC Dietary Fibre
- Group 1 Nutritional Testing
- Meat and Fish Contents/Speciation
- Elemental Analysis
- GMO Screening
- Heavy Metals
- Vitamins
- Water Activity (ERH), pH
- Allergens
- Preservatives (Benzoic Acid, Propionic Acid etc.)
- Sweeteners (Aspartame, Saccharin etc.)

Our prices are competitive and the quality of service is second to none.

With our PDF email service for technical reports and sample collection service, we can offer a 6-day fast track service as well as our standard 10-day turnaround service.
